DATE MAILED: 10/20/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/748,277

Applicant(s)

MA ET AL.

Examiner

Timothy L Rude

Art Unit

2883

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 July 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 6-12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 6-12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claims

1. Claim 6 is amended.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2883

2. Claims 6-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art (APA) in view of Dingwall et al (Dingwall) USPAT 5,307,188.

As to claims 6 and 9-12, APA discloses in Figures 1-4 (Specification pages 2-4), a dot matrix (Specification, Page 2, lines 18-22) liquid crystal display (LCD) device, comprising:

Fig. 1

(Conventional Art)

an upper polarizer, 14; on an upper substrate, 4;

a lower substrate, 4, on a lower polarizer, 12;

a liquid crystal layer (not shown) disposed between the upper substrate and the lower substrate; and

Art Unit: 2883

a backlight device, 30, disposed opposite and adjacent to the lower polarizer for emitting light toward the lower polarizer (Figure 1) (please note that adjacent does not preclude structures between those items considered to be adjacent, e.g., two houses may be adjacent despite the existence of an intervening garage);

wherein at least a black pad, 40, that acts as a light shield (Applicant's light shielding film) formed in a rectangular shape only along a peripheral portion (evident from Specification, Page 3, lines 11-14); and

wherein the light shielding film absorbs light (property of the color black).

APA does not explicitly disclose a lower polarizer that includes said light shielding film.

Dingwall teaches in Figures 2 and 3 (col. 5, lines 33-40 and col. 7, line 60 through col. 8 line 28), a liquid crystal display (LCD) device, comprising: a lower substrate, 236b, on a lower polarizer, 237b, that includes an opaque black mask, 235 (Applicant's light shielding film), to provide greater flexibility by first printing the black mask to define the image elements (or viewing area) with minimal alignment concerns to eliminate light leaks and allow the use of a true black mask rather than a gray mask to provide a true dead front (col. 5, lines 33-46).

Dingwall is evidence that ordinary workers in the art of liquid crystals would find the reason, suggestion, or motivation to add a lower polarizer that includes an opaque black mask (Applicant's light shielding film) to provide greater flexibility by first printing the black mask to define the image elements (or viewing area) with minimal alignment

Art Unit: 2883

concerns to eliminate light leaks and allow the use of a true black mask rather than a gray mask to provide a true dead front.

Therefore, it would have been obvious to one having ordinary skill in the art of liquid crystals at the time the invention was made to modify the LCD of APA with a lower polarizer that includes a light shielding film of Dingwall to provide greater flexibility by first printing the black mask to define the viewing area with minimal alignment concerns to eliminate light leaks and allow the use of a true black mask rather than a gray mask to provide a true dead front.

As to claims 7 and 8, Dingwall, as combined above, teaches (col. 8, lines 11-28) a liquid crystal display (LCD) device of claim 1, wherein the at least one opaque surround or black mask, 235, (Applicant's light shielding film) is formed by a photographic process, by offset lithography (Applicant's coating), or by screen printing (Applicant's printed material) black mask materials that absorb the light (col. 8, lines 29-33, and col. 13, lines 25 and 26).

Response to Arguments

3. Applicant's arguments filed on 10 February 2004 have been fully considered but they are not persuasive.

Applicant's ONLY arguments are as follows:

Examiner has misinterpreted the claim in alleging that Dingwall discloses a black mask "235 shaped to run along all four sides of only the rectangular lower polarizer".

Examiner's responses to Applicant's ONLY arguments are as follows:

It is respectfully pointed out that Dingwall was not applied to teach the claimed shape and location of the black matrix. APA provides the claimed shape and location. Dingwall was applied to teach an opaque black mask printed on a polarizer with motivation to combine per rejections above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2883

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy L Rude whose telephone number is (571) 272-2301. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on (571) 272-2415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
